		(ii)		Copper Aluminium Brass Iron (1 for order) **No,** the data does not agree with the experimental data (ecf) (1) Justification, including metal name (1) e.g. because copper has a greater thermal conductivity than aluminium so the pin should fall off the copper rod before aluminium rod			3	3		1
	(c)			Mercury is a <u>liquid</u> (at room temperature)			1	1
