Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
		(ii)		(in magnesium oxide) the ions have higher charges (1) electrostatic attraction is greater / attraction between ions is greater / ionic bonds are stronger (1) accept converse for both marks	1	1		2		
		(iii)		88 (3) accept 87.5 if answer incorrect credit each correct step in method $\frac{4.12}{58.5}$ = 0.0704 (1) $\frac{0.0704}{0.080}$ = 0.88 (1) 0.88 × 100 = 88 (1) alternative method 0.080 × 58.5 / 4.68 (1) $\frac{4.12}{4.68}$ = 0.88 (1) 0.88 × 100 = 88 (1)		3		3	3	
				Question 5 total	**3**	**8**	**0**	**11**	**3**	**0**
