

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
5	(a)			A – Liver B – Stomach C – Pancreas reject pancrease All correct = 2 marks 2 correct = 1 mark	2			2		
	(b)			<u>active site</u> is not complementary to fat/ fat (molecule) will not fit into <u>active site</u>		1		1		
	(c)	(i)		- Glucose (1) Any three (x1) from {Absorption/ uptake} decreases when cyanide is added (1) - Active transport requires {energy/ ATP} (1) - but ATP not produced/ energy not released (1) - to move substance against concentration gradient/ or description (1) No {ATP/ energy} for active transport = 2 marks Glucose is moved from a low to high concentration = 2 marks		4		4		
		(ii)		{All/ the three sugars/ they} are still {absorbed/ taken up} in the presence of cyanide (1) Diffusion {is passive/ does not require ATP/ energy not required} (1)			2	2		
	(d)			{Lower/ reduced/ small/ not enough} <u>surface area</u> (of villi)			1	1
