

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
5	(a)			Indicative content sulfur burns in air forming sulfur dioxide $\text{S} + \text{O}_2 \rightarrow \text{SO}_2$ sulfur dioxide converted to sulfur trioxide in a reversible reaction 1 atm – low pressure favours high yield 450°C – low temp favours high yield but rate is low V ₂ O ₅ catalyst compensates for low rate sulfur trioxide added to conc. sulfuric acid forming oleum $\text{SO}_3 + \text{H}_2\text{SO}_4 \rightarrow \text{H}_2\text{S}_2\text{O}_7$ exothermic reaction oleum diluted with water to form sulfuric acid	6			6		
				5-6 marks Full description and explanation of each stage; attempt at explaining conditions <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3-4 marks Description and partial explanation of at least two stages <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i> 1-2 marks Basic description of at least one stage <i>There is a basic line of reasoning which is not coherent, largely irrelevant, supported by limited evidence and with very little structure. The candidate uses limited scientific terminology and inaccuracies in spelling, punctuation and grammar.</i> 0 marks No attempt made or no response worthy of credit.
