

5. (a) The diagram shows how conductors can be heated using a varying magnetic field.

Explain why the heated object gets hot **and** why a high frequency alternating current is used. [4]

.....

.....

.....

.....

.....

.....

.....

(b) Explain how a Hall voltage arises in a Hall probe, how it is measured **and** how this can be used to measure the magnetic flux density. A diagram should be included in your answer. [6 QER]
