

3. The **distance-time** graph below shows a journey by car.

- (a) Describe the motion shown by using data from the graph. Include a **comparison of the speeds** in each part of the journey.

[6 QER]

(b) Use the information in the graph to answer the following questions.

(i) Calculate the total distance travelled during the journey. [1]

distance = km

(ii) Use an equation from page 2 to calculate the mean speed of the journey. [3]

mean speed = km/h
