		(ii)	$FL = W_B d + 490W_R (1)$ Manipulation and use of $L = 980$ to show $F = \frac{W_B d}{L} + \frac{490W_R}{980} (1)$ Alternative: $FL = W_B d + W_R \frac{L}{2} (1)$ $\therefore \left[FL = W_B d + W_R \frac{L}{2} \right] \rightarrow F = \frac{W_B d}{L} + \frac{W_R}{2} (1)$		2		2	2	2
