				AO1	AO2	AO3	Total	Maths	Prac
	(c)		Explanation: Momentum change (decrease) of snowball is reduced / less (compared to (b)(i)) (1) Momentum change (increase) of hat is reduced / less or compared with 2.2 [N s] (1) Therefore velocity (increase) of hat is less (than in (b)(i)) and so Natalie is incorrect (1) If calculation and conclusion only, award maximum 2 marks (treat as neutral): e.g. $1.8 = 0.6v$ (1) $v = 3 \text{ [m s}^{-1}\text{]}$ and hence Natalie is incorrect (1)			3	3
