	(e)			Slope $\propto \frac{1}{\sqrt{g}}$ or equivalent e.g. gradient = $\frac{2\pi}{\sqrt{g}}$ or gradient = $\frac{40\pi}{\sqrt{g}}$ (1) Ratio of slopes = $\frac{1}{\sqrt{0.2}}$ or $\sqrt{5}$ or new gradient = 89 or two correct expressions for gradients e.g. $\frac{2\pi}{\sqrt{g}}$ and $\frac{2\pi}{\sqrt{0.2g}}$ or $\frac{40\pi}{\sqrt{g}}$ and $\frac{40\pi}{\sqrt{0.2g}}$ (1) Ratio of gradients = 2.24ish and sensible comment (1)			3	3	3
