				AO1	AO2	AO3	Total	Maths	Prac
	(e)		Easier to escape or more electrons escaping or tunnelling linked to electrons escaping (1) Light at lower V or <u>measured</u> V is lower or actual barrier is higher (1)		2		2		
	(f)	(i)	Electrons have greater [internal] energy i.e. link between temperature and energy (1) More electrons (1)		2		2		
		(ii)	Use of $\frac{3}{2}kT$ can be implied (1) Conversion to eV (1) Answer = 0.038 [eV] (1) Diode switches on 0.038 V too early or 0.038 V is an uncertainty - any good sensible comment regarding this equivalent pd (1)			4	4	2
