

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
				N.B. 2 When voltage triples from 2 [V] to 6 [V] (1) Current changes from 0.9 [A] to 1.7 [A] (1) This is not double (1) so not true To earn credit voltages must be within the range of 0.9 V to 8.4 V N.B.3 A correct conclusion based on incorrect voltage readings taken from the graph award 1 mark.						
		(ii)		Voltage = 12 [V] (1) Current = 2.25 ± 0.05 [A] (1) both readings from graph Power = 27 [W] or 26.4 [W] or 27.6 [W] (1)		3		3	3	3
	(c)	(i)		Substitution: $\frac{12}{6}$ (1) = 2 [A] (1)	1	1		2	2	2
		(ii)		Straight line from origin through (12,2 ecf)		1		1	1	1
