6				Indicative content: Insulating the house will reduce energy bills for the householder by reducing heat loss from the house. It will also reduce the amount of CO₂ produced reducing the impact on global warming. Joanne should fit cavity wall insulation and draught proofing. The total cost of these is slightly less than £1500 but they will save her the most money per year [£345]. They have the biggest reduction in CO₂ emissions [790 kg]. These also have the lowest payback times of the 4 methods so will start to save her money more quickly. 5–6 marks Description of advantages, types and reasons (including at least 2 reasons). <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3–4 marks Description of two out of advantages, types and reasons or limited descriptions of all three. <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i>	2		4	6
