

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
9	(a)	(i)		5 [cm ³]		1		1	1	1
		(ii)		Substitution: $\frac{15}{5}$ ecf (1) = 3 [g/cm ³] (1)	1	1		2	2	2
		(iii)		Selection of 2.7 (1) 3 is <u>closest</u> to 2.7 / only 0.3 difference / this is the <u>closest</u> value (1) so agree with Ffion N.B. Award 2 marks for Ffion is correct, it is closest to aluminium because there is only a 0.3 difference. Conclusion must be present to award both marks Alternative: when applying ecf from (a)(ii) Naming the material with the closest density to their calculated value (1) Comment that their value is closest to this stated density value (1) so disagree with Ffion Conclusion must be present to award both marks Alternative: when applying ecf from (a)(ii) Selection of 2.7 (1) Comment comparing their value to 2.7 e.g. it is not the <u>closest</u> to 2.7 (1) so disagree with Ffion Conclusion must be present to award both marks			2	2	2	2
