

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
4	(a)			Any 3 (×1) from: - the cables can be made thinner [because there are two paths for the current] - Each part of the cable carries less current [because the current flows two ways] - sockets can be {placed / added} anywhere on the ring - each socket has 230V [accept: same voltage] applied or they can be operated separately	3			3		
	(b)	(i)		MCB / fuse (1) [not just: circuit breaker] <u>current</u> overload / too much <u>current</u> / <u>current</u> surge (1)		2		2		
		(ii)		RCCB / RCD / ELCB (1) [not: Earth wire or just circuit breaker] {current / magnetic field} difference <u>between L and N</u> (1)		2		2		
	(c)			If a fault develops where live wire touches casing (1) Metal is a conductor and plastic is an insulator (1) Not: reference to 'heat conductor' or equiv.	2			2
