					AO1	AO2	AO3	Total	Maths	Prac
	(b)			Correct for first 2 hours [as $\frac{10}{2} = 5^{\circ}\text{C}/\text{hour}$] (1) Incorrect for the whole 10 hours as $\frac{30}{10} = 3^{\circ}\text{C}/\text{hour}$ / incorrect because for the last 8 hours $\frac{20}{8} = 2.5^{\circ}\text{C}/\text{hour}$ (1) Alternative: After 2 hours temperature reduced by 10°C (1) after 10 hours should have reduced by 50°C / after 10 hours should have finished at 40°C / in the last 8 hours it should have dropped by 40°C so not always correct (1)			2	2	2
