

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
2 FT	(a)			<u>stops</u> bacterial growth (1) cooking/heating/boiling (1) salting (1)	3			3		
	(b)	(i)		Any 1 × (1) from: Vomiting (1) diarrhoea (1) stomach pains /nausea (1)	1			1		
		(ii)		<i>Campylobacter</i> / <i>E. coli</i> / <i>Salmonella</i> (1)	1			1		
		(iii)		Toxins / poisons (1)	1			1		
	(c)	(i)	I	colonies have clumped together (1) Unable to count individual colonies/too many colonies to count (1)			2	2		2
			II	Not enough colonies (for valid results) (1)			1	1		1
		(ii)	I	Plate 4 Accept 15			1	1		1
			II	Mean number of colonies = $\frac{150}{5}$ (ecf) (1) = 30 (1) (Allow sum of remaining 5 values as ecf from previous answer) Count = 30 (ecf) × 10 000 = 300 000 / cm ³ (1) subs Or Mean number of colonies = $\frac{165}{6}$ = 27.5 (1) Count = 27.5 (ecf) × 10 000 = 275 000 / cm ³ (1) subs Accept 280 000 Allow (1) if candidate has ignored anomaly but calculated the answer incorrectly	1	2		3	3	3
