

Answer all questions.

1. (a) Light from distant galaxies is changed as it travels through the Universe.

Tick (✓) the **three** correct statements below. [3]

The wavelengths of light from distant galaxies have decreased. ☐

Distant galaxies look red. ☐

Absorption spectra from distant galaxies show red shift. ☐

The Universe has expanded since the light was given out from distant galaxies. ☐

Light received from our Sun is shifted to the blue end of the spectrum. ☐

The Sun's absorption spectrum shows no red shift. ☐

(b) Name the model of the origin of the Universe that is supported by cosmological red shift. [1]
