

Answer all questions.

1. Various types of radiation form a continuous spectrum called the electromagnetic (em) spectrum. The diagram shows the regions of the em spectrum.

Gamma rays	X-rays	Ultraviolet	Visible light	A	Microwaves	Radio waves
------------	--------	-------------	---------------	----------	------------	-------------

- (a) (i) Complete the arrow above, using **only one** of the following phrases. [1]

- decreasing speed
- increasing speed
- increasing frequency
- decreasing energy

- (ii) Name the em radiation labelled **A** in the diagram. [1]

.....

- (b) (i) Name the ionising em wave given out by some radioactive materials. [1]

.....

- (ii) State why ionising em radiation is dangerous to humans. [1]

.....
