

Answer all questions.

1. The diagrams below show the apparatus used to find the density of a fragment of bone. The diagram of the measuring cylinder shows the water level before and after the bone fragment was added.

- (a) (i) Use the information in the diagrams to **complete the table below**. [2]

Mass of bone	 g
Volume of bone	 cm³

- (ii) Use an equation from page 2 to calculate the density of the bone fragment. [2]

Density = g/cm³

- (b) Explain, in terms of particles, why bone has a greater density than water. [2]
