

7. Students study refraction of waves in a ripple tank.

They set up the tank to show waves going from shallow water into deeper water.

The diagram shows a number of wavefronts approaching a boundary between shallow and deep water.

The first four wavefronts have reached the boundary.

(a) **Complete the diagram** to show the wavefronts in the deep water.

[3]

- (b) In a separate experiment, the wavefronts pass over the boundary in the way shown below.

Sam says that the speed of the waves is greater in deep water than shallow water.

Explain whether you agree with his statement.
