

Question				Marking details	Marks available														
					AO1	AO2	AO3	Total	Maths	Prac									
1	(a)	(i)		Total of rank orders = 3 (1) Which is the lowest total (1) [so agree] OR [Type B power stations] are ranked number 1 (1) for all features (1) [and so agree] Award 2 marks for all 3 named features: [Type B power stations] have no emissions and the running cost is {nearly 0 / lowest} and the efficiency {is the best / rank number 1} Award 1 mark for 2 named features e.g. [Type B power stations] have no emissions and the running cost is {nearly 0 / lowest} Don't accept running cost is low or emissions are low			2	2											
		(ii)	<table><tr><td>Type A, B, C or D</td><td>Energy source</td></tr><tr><td>A</td><td>Fossil</td></tr><tr><td>B</td><td>Hydroelectric</td></tr><tr><td>C</td><td>Fossil</td></tr><tr><td>D</td><td>Nuclear</td></tr></table> 4 correct award 3 marks 2 or 3 correct award 2 marks 1 correct award 1 mark	Type A, B, C or D	Energy source	A	Fossil	B	Hydroelectric	C	Fossil	D	Nuclear			3	3		
Type A, B, C or D	Energy source																		
A	Fossil																		
B	Hydroelectric																		
C	Fossil																		
D	Nuclear																		
	(b)		Selection and substitution: $\frac{170\,000}{200\,000} \times 100$ (1) = 85 (1) Answer of 0.85 award 1 mark only		2		2	2
