7. Describe how you would use the apparatus listed below and shown in the diagram to investigate the principle of moments.

[6 QER]

List of apparatus:

- metre ruler with small hole at centre
- $2 \times 100\text{g}$ mass hangers
- $8 \times 100\text{g}$ masses
- $2 \times$ loops of cotton
- clamp stand, boss and clamp
- optical pin and cork
- small piece of plasticine

Include in your answer:

- How you will set up the apparatus
- What measurements you will take
- How you will analyse your results to show the principle of moments.
