

			Maximum current for 5 sheds= 5×80 (1) = 400 A (1) Max voltage available = $\frac{100\,000}{400}$ (1) =250 V which is more than the 230 required so yes (1)						
		(ii)	Uses {sustainable/renewable} energy (1) CO ₂ released is absorbed by (new) plant growth (1) / Carbon neutral (1) So reduces contribution to Greenhouse effect (1)	3			3
