					AO1	AO2	AO3	Total	Maths	Prac
				5-6 marks Comprehensive description of the method above. The water must be warmed until all the salt dissolves. When cooling the temperature of the appearance of crystals is noted. Repeats are also important. <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3-4 marks Candidates describe most of the method, e.g. heat water, add salt, add more salt, identify the mass of salt added and change in temperature. <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i> 1-2 marks Candidates describe some of the method. E.g. heat the water and add the salt. <i>There is a basic line of reasoning which is not coherent, largely irrelevant, supported by limited evidence and with very little structure. The candidate used limited scientific terminology and inaccuracies in spelling, punctuation and grammar.</i> 0 marks No attempt made or no response worthy of credit.
