

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
3.				Indicative content • Elements arranged according to their atomic number • Arranged in periods and groups • Groups are arranged in columns • Periods are arranged in rows • Same group having similar properties • With examples from table – (group 1 and group 7 expected) chemical and physical • Same number of electrons in the outer shell in a group • Number of electrons in the outer shell determine their properties • Two main classes are metals to the left and non-metals to the right of the table 5-6 marks Students give a comprehensive description of the periodic table. A description of the arrangements of periods and groups with examples, linked to number of shells. Using physical and chemical properties as examples. Reference to numbers of electrons determining properties. Description of arrangement of metals and non metals. At least 6 points <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i> 3-4 marks Students describe the periodic table with reference to the periods and groups. Some examples of physical or chemical properties may be given but not all correct. There may be some reference to size of elements or their reactivity. 3-5 points <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i>	6
