

7. *Tradescantia* is a plant whose leaves have green and white areas.

Tradescantia leaves

In the experiment below, a *Tradescantia* plant is used in an investigation to demonstrate **three** factors, **A**, **B** and **C**, needed for photosynthesis.

Examiner
only

(a) (i) State the factor needed for photosynthesis, which is being demonstrated in each of the following: [3]

A

B

C

(ii) How could the experiment in flasks **B** and **B1** be improved? Explain your answer. [2]

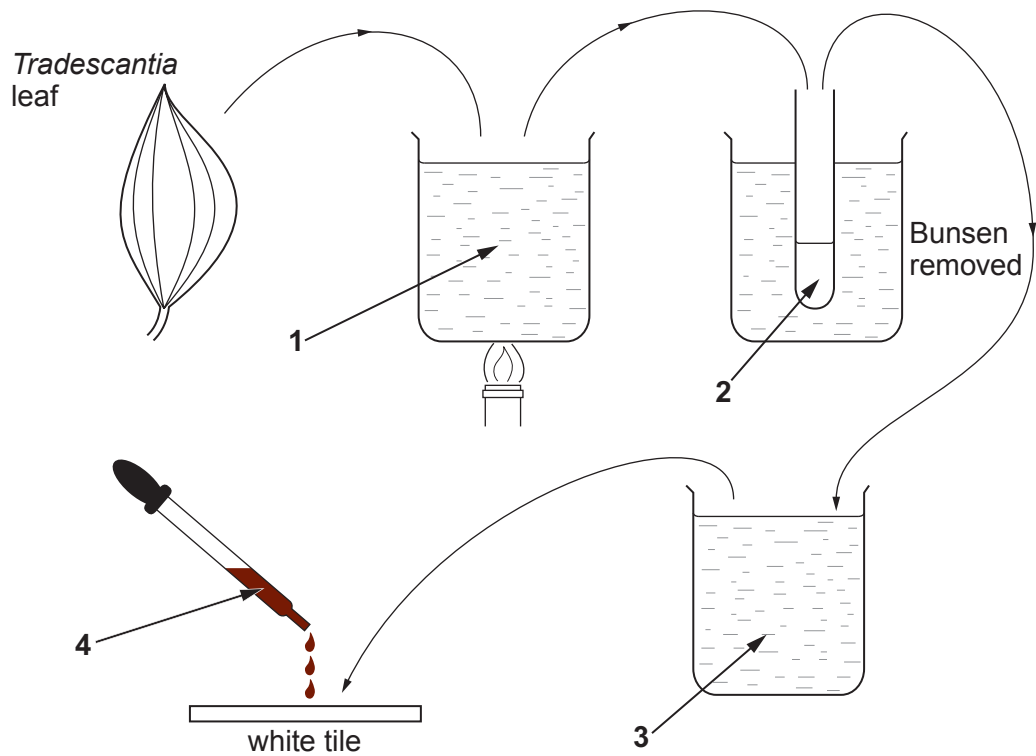

.....
.....

(iii) Before the apparatus was set up, the *Tradescantia* plant was kept in a dark cupboard for 48 hours. Explain the reason for this. [2]

.....
.....
.....

(b) The diagram below shows the stages in testing a leaf for starch.

Name the liquids **1**, **2**, **3** and **4** shown in the diagram.
