

8. In the past, many countries, including the UK, have disposed of sewage sludge in the open ocean. A famous example of this practice is the ‘106 mile’ dump site in the North West Atlantic. This site, 106 miles off the east coast of the USA, served the populations of New York and New Jersey. Prior to the use of the ‘106 mile’ dump site sewage sludge was disposed of at the ‘12 mile’ dump site.

(All data from the US Environmental Protection Agency Report to Congress Sept 1995)
