

2. Image 2.1 shows a section through the human skin.

Image 2.1

(a) Label parts **A**, **B** and **C** on **Image 2.1** using words from the box. [3]

sweat duct	blood vessel	erector muscle	sweat pore	hair	sweat gland
---------------	-----------------	-------------------	---------------	------	----------------

(b) State **one** way the skin reacts to cool us down when we get too hot. [1]

.....

.....

Examiner
only

- (i) **Complete the Punnett square** below to show the possible genotypes of the future children of person **1** and person **2**. Use the letters **N** to represent the dominant allele and **n** to represent the allele that causes cystic fibrosis. [2]

- (ii) Use the Punnett square to predict the probability of person **1** and person **2** having another child who has cystic fibrosis. [1]

.....

- (d) One treatment for cystic fibrosis is to introduce dominant alleles (**N**) into the cells lining the lungs.

- (i) State the name of this type of treatment. [1]

.....

- (ii) State the method that is used to deliver the dominant alleles to the lungs. [1]

.....

- (iii) State **one** problem with the use of this method. [1]
