

3. The diagram shows the two types of cell division occurring in a **cat** and the process of fertilisation. The number of chromosomes in a body cell from the ovary of a cat is also shown.

(i) State the type of cell division occurring at points: [1]

P

Q

(ii) State the number of chromosomes in the following cells: [2]

A

B

C

D

(iii) Apart from chromosome number, state **one other** difference, between the daughter cells produced by cell division P and cell division Q. [1]
