6. Negative feedback mechanisms maintain optimum conditions inside the body.

(a) (i) State what is meant by the term *negative feedback*. [2]

.....

.....

.....

(ii) State **three** factors that are controlled within the body to maintain optimum conditions. [2]

.....

.....

.....

(b) Hypoglycaemia is a condition which occurs when blood glucose levels fall to a dangerously low concentration. The normal blood glucose range is between 4.0 and 7.5 mmol/l.

(i) Suggest **two** reasons which could cause the blood glucose level in a person with insulin dependent diabetes to fall below 4.0 mmol/l. [2]

.....

.....

.....

.....

(ii) Explain why a glucagon injection may be used to treat severe hypoglycaemia. [3]
