

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
		(ii)		Unsaturated contain {double bonds between carbons/ C=C}(1) Any 3 (x1) from: • Produces a kink / bend, in the side chain (1) • Less packing is possible/ increased distance between the chains (1) • Lowers intermolecular force /(phase) transition temperature (1) • less energy needed {to break the bonds/ overcome the intermolecular forces} (1)	1		3	4		
		(iii)		Between the {fatty acids / hydrophobic tails} Accept labelled diagram		1		1		
		(iv)		Raises level of LDLs/ causes LDLs to be made (1) Increase incidence of atheroma in arteries/ detailed description of atheroma (1)	2			2		
				Question 5 total	3	5	6	14	0	0
