

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths *	Prac **
5	(a)	(i)		Make sure maggots do not come into contact with NaOH/ stop the maggots from drowning			1	1		1
		(ii)		Any two from - Gives time for the maggots to acclimatise to temp/conditions/ owtte(1) - Gas may expand/contract(1) - Time for {NaOH to equilibrate/equipment to equilibrate/ a {constant/ 25 °C} temperature} (1)		2		2		2
		(iii)		- Carry out same experiment under same conditions with same {mass/volume } of {glass beads/ dead disinfected maggots}(1) - Shows it is the respiration of maggots causing the (volume) change (1)			2	2		
	(b)	(i)		Any two from: EXPT1. - Oxygen used by the maggots for <u>aerobic</u> respiration; (1) <u>Released</u> CO₂ is absorbed by NaOH (1) - Volume/pressure decreases in tube. (1) EXPT2. Volume of O ₂ used equal to volume of CO ₂ evolved (1)			3	3		3
		(ii)		- increases {reliability / reproducibility} (of mean) (1) NOT accurate/ repeatability - increase confidence / {exclude/ identify} anomalous results / allows use of {statistical test/ named statistical test} (1)		2		2		2
