

Question 6				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
				Two different species Not separate species as can interbreed to produce fertile offspring Gene pool still sufficiently similar Subsequent interbreeding of hybrids with Brown Bears Overlapping territories (due to receding ice) allows the 2 groups contact for interbreeding Will continue to interbreed so gradual loss of pure Polar Bears May outcompete pure Brown Bears/Loss of genetic biodiversity 7-9 marks Detailed coverage of all three sections <i>The candidate constructs an articulate, integrated account, correctly linking relevant points, such as those in the indicative content, which shows sequential reasoning. The answer fully addresses the question with no irrelevant inclusions or significant omissions. The candidate uses scientific conventions and vocabulary appropriately and accurately.</i> 4-6 marks Some detail of two sections or less coverage of three sections <i>The candidate constructs an account correctly linking some relevant points, such as those in the indicative content, showing some reasoning. The answer addresses the question with some omissions. The candidate usually uses scientific conventions and vocabulary appropriately and accurately.</i>
