

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
6	(a)	(i)		Glucose	1			1		
		(ii)	I	A cuticle	1			1		
			II	(More) Light is {absorbed/ taken in} {by chlorophyll/ in chloroplasts} (1) {Palisade cells/ it/ they} have <u>most</u> {chloroplasts/ chlorophyll} (1) {Palisade cells/ it/ they} are near the upper surface (of the leaf so absorb light efficiently) (1)	1	1 1		3		
	(b)	(i)		Correct scale (1) 6 plots correct 2 marks $\pm$ 1 small square 4/ 5 plots correct 1 mark Line (1) no extrapolation		1 2 1		4	4	
		(ii)	I	Increase (in rate) then decrease Identification of 35 (°C)/ 64 (a.u.) ecf from 6bi			1 1	2		
			II	29		1		1	1	
		(iii)	I	35 (°C) associated with highest rate of <u>photosynthesis</u> ecf			1	1		
			II	Increase the number of temperatures tested in the 30 – 40 range			1	1		1
