

Question				Marking details	Marks available														
					AO1	AO2	AO3	Total	Maths	Prac									
6/1	(a)	(i)		23	1			1											
		(ii)		Male XY Female XX	1			1											
		(iii)		<table><tr><td></td><td>X</td><td>Y</td></tr><tr><td>X</td><td>XX</td><td>XY</td></tr><tr><td>X</td><td>XX</td><td>XY</td></tr></table>		X	Y	X	XX	XY	X	XX	XY		1		2		
	X			Y															
X	XX			XY															
X	XX			XY															
				Correct gametes X and Y symbols only Correct mechanics Allow ecf from (ii) and from gametes to offspring															
	(b)	(i)		1.76 (to two dp) = 2 marks Female mean = $12.35 / 7 = 1.7642 = 1$ mark		2		2	2										
		(ii)	I	Males are taller than females			1	1		1									
			II	Investigation shows female average height is greater than males so hypothesis is not supported. Accept figures			1	1		2									
			III	Increase sample size/ Should all be over 25 / all reached full height			1	1											
	(c)			Requesting information for heights (rather than measuring heights) Ignore references to conversion of units			1	1		1									
				Total marks for Question 6/1	2	4	4	10	2	4
