

3. The diagram below shows a section through a leaf of a sunflower (*Helianthus sp.*).

(a) State the name of structures **A**, **B** and **C**. [2]

- A**
- B**
- C**

(b) (i) The palisade cell is an example of a specialised cell.
What is the advantage to the plant of having specialised cells? [1]

.....

.....

(ii) The leaf is considered to be an organ of the plant. What is meant by this statement? [1]

.....

.....

only

(c) (i) Measure the length of line **Y – Z** on the drawing.

[1]

Length = mm

(ii) The actual length of **Y – Z** on the diagram opposite is 225 μm .
Calculate the magnification of the drawing.
(1 mm = 1000 μm)

[2]

= $\times$
