

5. According to a report by the British Heart Foundation in 2017, more than 20 million people in the UK were physically inactive. The report warned that inactivity increases the risk of heart disease and costs the NHS around £1.2 billion each year.
- A heart attack is a serious medical emergency in which the supply of blood to the heart is suddenly blocked, usually by a blood clot.

Image 5.1 shows the heart following a heart attack and **Image 5.2** shows a section through one of the heart's blood vessels.

Image 5.1

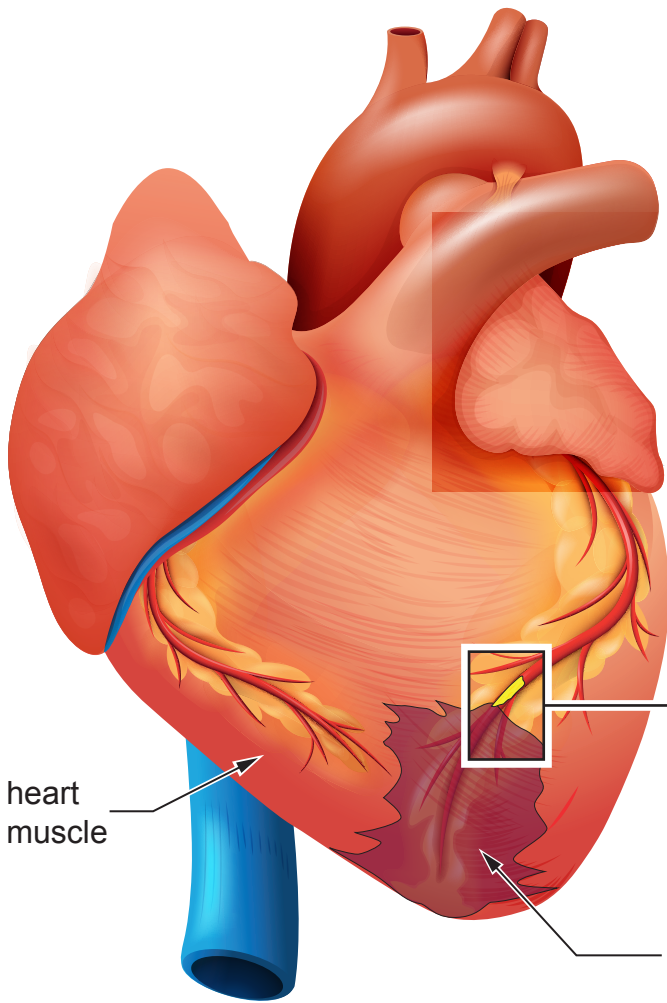

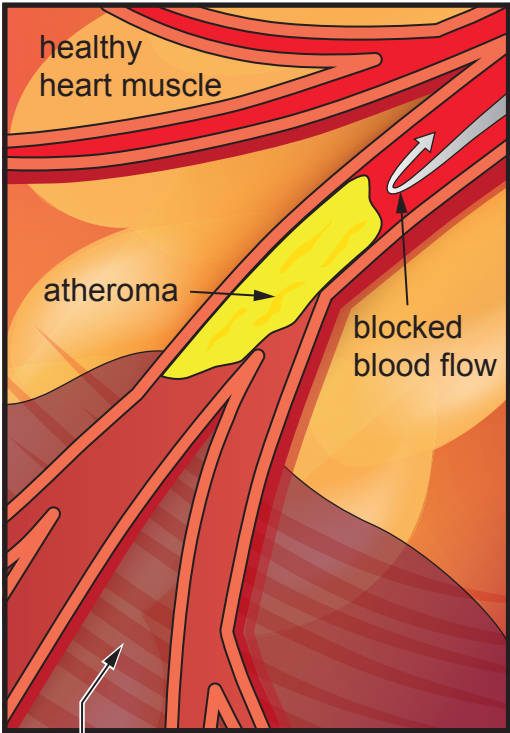

Image 5.2

- (a) (i) State the name of the blood vessel shown in **Image 5.2**. [1]
-
- (ii) State which part of blood is responsible for clot formation. [1]
-

Examiner
only

(b) (i) Explain how the atheroma has led to the death of heart muscle cells shown in **Images 5.1** and **5.2**. [3]
