

3. The diagrams show fatty deposits (an atheroma) building up in an artery. One cause of this is high cholesterol. This may eventually cause a blood clot to form.

(a) Explain how an unbalanced diet and lack of exercise could lead to an atheroma formation. [2]

.....

.....

.....

.....

(b) Name a group of drugs which reduces the chance of build-up of fatty deposits in arteries. [1]

.....

(c) Explain how an atheroma may lead to a heart attack. [2]

.....
