

7. Some students investigated the tropic responses of the dandelion (*Taraxacum officinale*).

(a) State what is meant by tropic responses. [1]

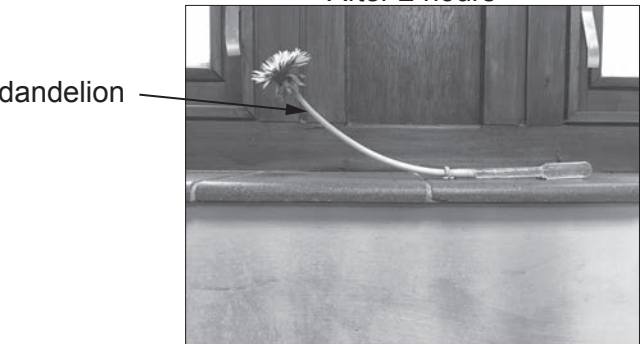

.....

.....

(b) The students set up the apparatus shown below on a south-facing window-sill.

After 2 hours

The students concluded that the dandelion had shown positive phototropism.

Suggest why the students cannot be confident in their conclusion. Explain how they could change the method to improve confidence in their conclusion. [3]

.....

.....

.....

.....

.....

(c) State the name of the plant hormone responsible for phototropism. [1]
