

3. Draw a section of the addition polymer formed from the monomer below.

You should show **two** repeat units.

[1]

4. Bromine reacts with methanoic acid according to the equation below.

A student wanted to follow the rate of the reaction and mixed solutions of known concentration of bromine and methanoic acid.

Suggest **two** methods which the student could use to follow the rate of this reaction as it proceeds. [2]

Method 1

.....

Method 2

.....
