

6. (a) A technician carried out a flame test and a silver nitrate test on a solution of sodium iodide.

Draw **one** line from **each** test to the correct observation.

[2]

Test	Observation
flame test	red flame
	yellow flame
	lilac flame
silver nitrate test	white precipitate
	cream precipitate
	yellow precipitate

- (b) (i) When silver nitrate and sodium iodide react, sodium nitrate and a precipitate of silver iodide are formed.

Write the formulae of sodium nitrate and silver iodide to complete the equation. [2]

- (ii) Suggest a method you could use to remove the precipitate from the reaction mixture.
