(c) This advert was published to encourage people to save water by taking a shower instead of a bath.

To
Shower
or to
Bathe?

A shower for
8 minutes
uses 76 litres

A full bath
uses 160 litres

Use the data in the advert to calculate the percentage of water **saved** by taking a shower for 8 minutes rather than running a full bath. [2]

Percentage of water saved = %

10
