

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
2	(a)			• <u>Reduce</u> {water/ heat} loss (1) NOT prevent • Filter air / Trap {dirt / dust / particles} (1) - Ignore bacteria/ viruses Reject reference to function of cilia • Short diffusion {pathway/distance} (1) • Reduce surface tension / prevent collapse (of alveoli and tracheoles during expiration)/ prevent (alveoli/tracheoles) sticking together (1)	1	3		4		
	(b)	(i)		Allows trachea to collapse slightly when food passes down the oesophagus/ allows peristalsis/ increase in size of oesophagus caused by passage of food/ owtte			1	1		
		(ii)		Xylem		1		1		
	(c)	(i)		Any four (x1) from A. (expanding the rib cage / pulling on outer pleural membrane) Lowers {pressure in pleural cavity / pleural pressure} (1) B. <u>Inner</u> pleural membrane pulls on the lungs (1) C. Which increases volume of {lungs / alveoli / thorax} (1) D. Which decreases pressure in {lungs / alveoli} (1) E. Below atmospheric pressure / so air moves in / credit correct reference to negative pressure breathing (1) Answer must be in correct sequence (although some mark points may be omitted)		4		4		
		(ii)		Any one from • {Greater / higher} pressure/ faster pressure changes • {Greater / higher} volume/ faster changes in volume • More {rapid/ shorter} {inspiration/ expiration}/ more rapid breathing/ deeper breaths/ increased breathing rate		1		1
