6.				<u>General Adaptations:</u> • Heterotrophic • Obtain nutrition from the host • Produce large numbers of eggs / offspring • Resistant stages / eggs <u>Specific Adaptations (Taenia):</u> • Endoparasite • {2 / primary & secondary / intermediate} hosts <table><tr><td>• scolex / hooks / suckers</td><td>to prevent removal (by peristalsis)/ attach to gut wall</td></tr><tr><td>• Long & flat / no digestive system</td><td>Large sa: volume ratio to absorb pre-digested nutrients / pre-digested nutrients absorbed across {cuticle / body surface}</td></tr><tr><td>• Thick cuticle/ mucus</td><td>to prevent digestion by host's enzymes/ immune system</td></tr><tr><td>• Hermaphrodite/ or description of</td><td>self-fertilisation/ unable to find mate / allows them to reproduce</td></tr></table> <u>Specific Adaptations (Pediculus):</u> • Ectoparasite • Single host <table><tr><td>• claws (adult) / "glue" (eggs / nits)</td><td>to prevent removal (by scratching)/ to attach to hairs</td></tr><tr><td>• holozoic</td><td>has gut for {digestion / absorption}</td></tr><tr><td>• Piercing mouthparts</td><td>sucks blood</td></tr><tr><td>• Separate sexes</td><td>as a mate is easy to find</td></tr></table>	• scolex / hooks / suckers	to prevent removal (by peristalsis)/ attach to gut wall	• Long & flat / no digestive system	Large sa: volume ratio to absorb pre-digested nutrients / pre-digested nutrients absorbed across {cuticle / body surface}	• Thick cuticle/ mucus	to prevent digestion by host's enzymes/ immune system	• Hermaphrodite/ or description of	self-fertilisation/ unable to find mate / allows them to reproduce	• claws (adult) / "glue" (eggs / nits)	to prevent removal (by scratching)/ to attach to hairs	• holozoic	has gut for {digestion / absorption}	• Piercing mouthparts	sucks blood	• Separate sexes	as a mate is easy to find	5	4		9		
• scolex / hooks / suckers	to prevent removal (by peristalsis)/ attach to gut wall																									
• Long & flat / no digestive system	Large sa: volume ratio to absorb pre-digested nutrients / pre-digested nutrients absorbed across {cuticle / body surface}																									
• Thick cuticle/ mucus	to prevent digestion by host's enzymes/ immune system																									
• Hermaphrodite/ or description of	self-fertilisation/ unable to find mate / allows them to reproduce																									
• claws (adult) / "glue" (eggs / nits)	to prevent removal (by scratching)/ to attach to hairs																									
• holozoic	has gut for {digestion / absorption}																									
• Piercing mouthparts	sucks blood																									
• Separate sexes	as a mate is easy to find

					AO1	AO2	AO3	Total	Maths	Prac
				7-9 marks Detailed account of all three sections <i>The candidate constructs an articulate, integrated account, correctly linking relevant points, such as those in the indicative content, which shows sequential reasoning. The answer fully addresses the question with no irrelevant inclusions or significant omissions. The candidate uses scientific conventions and vocabulary appropriately and accurately.</i> 4-6 marks Detail from two sections or less detailed account of three sections <i>The candidate constructs an account correctly linking some relevant points, such as those in the indicative content, showing some reasoning. The answer addresses the question with some omissions. The candidate usually uses scientific conventions and vocabulary appropriately and accurately.</i> 1-3 marks Detail from any one area <i>The candidate makes some relevant points, such as those in the indicative content, showing limited reasoning. The answer addresses the question with significant omissions. The candidate has limited use of scientific conventions and vocabulary.</i> 0 marks <i>The candidate does not make any attempt or give a relevant answer worthy of credit.</i>
