

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
3	(a)	(i)		A. HCl converts pepsinogen into pepsin (1) (ignore activates / reacts with) B. Prevents pepsin being activated inside cells (1) C. Pepsin would {hydrolyse / break down} <u>proteins</u> within the (stomach wall / the chief) cells / Pepsin would cause autolysis of cells (1) (ignore digests)		3		3		
		(ii)		{Produce / secrete} mucus (1)	1			1		
		(iii)		Any two (x1) from: A. Endopeptidases are secreted {before / owtte} exopeptidases (1) B. Endopeptidases {hydrolyse / break} {peptide bonds in the middle of the {protein / polypeptide chain} / non terminal peptide bonds} (1) C. This provides <u>more</u> {terminal / end} (peptide) bonds for exopeptidases / owtte (1)		2		2		
	(b)			X: epithelium NOT villus / epidermis / endothelium Y: muscle 2 correct = 1 mark 1/0 correct = 0 marks		1		1		

Question				Marking details	Marks Available					
					AO1	AO2	AO3	Total	Maths	Prac
	(c)	(i)		A parasite lives {in / on} a host organism to {derive nourishment / harming host / owtte}	1			1		
		(ii)		A. Reduced the surface area (1) B. (for the production of enzymes) so less digestion occurs (1) C. Less glucose absorbed therefore less {respiration/ATP produced} leads to {fatigue / tiredness} (1) D. Less water absorbed resulting in diarrhoea (1) If MP C or D not gained then allow 1 mark for less absorption (E)		4		4
