					AO1	AO2	AO3	Total	Maths *	Prac **
1	(c)			A. At 27°C {(rate of) respiration is lower than (the rate of) photosynthesis/ rate of photosynthesis is higher than (the rate of) respiration} (1) B. Therefore <u>more</u> {sugar/ glucose/ sucrose/ fructose} is produced (by photosynthesis) than is used (in respiration) (1) C. More {sugar/ glucose/ sucrose/ fructose} (stored) <u>in {fruit/ tomato}</u> (so sweeter tasting) (1) Accept answers referring to 40°C A. At 40°C rate of respiration is higher than (the rate of) photosynthesis/ rate of photosynthesis is lower than (rate of) respiration (1) B. Therefore <u>more</u> of the {sugar/ glucose/ sucrose/ fructose} produced by photosynthesis is used in respiration (1) C. Less {sugar/ glucose/ sucrose/ fructose} (stored) <u>in {fruit/ tomato}</u> (so less sweeter tasting) (1)			3	3
