

Question				Marking details		Marks available														
						AO1	AO2	AO3	Total	Maths	Prac									
2	(a)			{Stem cells/ they/it} can {turn/ change/ develop/ grow/ specialise/ adapt} into {intestinal/liver/cardiac/nerve/blood/muscle/ other} cells/ tissues		1			1											
	(b)			<table><tr><td>daughter cells are genetically identical</td><td>True/ T/✓</td></tr><tr><td>produces four daughter cells</td><td>False /F/ ✕</td></tr><tr><td>daughter cells retain the original chromosome number</td><td>True/ T/✓</td></tr><tr><td>daughter cells have chromosomes in pairs</td><td>True/ T/✓</td></tr><tr><td>produces gametes</td><td>False /F/ ✕</td></tr></table> all 5 correct = 3 4 correct = 2 3 correct =1	daughter cells are genetically identical	True/ T/✓	produces four daughter cells	False /F/ ✕	daughter cells retain the original chromosome number	True/ T/✓	daughter cells have chromosomes in pairs	True/ T/✓	produces gametes	False /F/ ✕	3			3		
daughter cells are genetically identical	True/ T/✓																			
produces four daughter cells	False /F/ ✕																			
daughter cells retain the original chromosome number	True/ T/✓																			
daughter cells have chromosomes in pairs	True/ T/✓																			
produces gametes	False /F/ ✕																			
	(c)			Any three (x1) from: - no need to {find/ wait for} donor/ quicker as already have own stem cells/ no waiting list (1) {no/ less chance of} rejection/ reference to compatibility/ no antibody response/ Body accepts them (1) - same {tissue type/ DNA/ genes} (1) - no ethical issues/ do not have to kill {embryos/ potential life} (1) - no {side effects/ negative reaction} (1)		3			3
