

SECTION A

Answer all questions in the spaces provided.

1. For the ionic compound caesium chloride, state the coordination number of the chloride ion. [1]

.....

2. The first four ionisation energies for an element are shown in the table below.

Ionisation energy / kJ mol^{-1}			
1st	2nd	3rd	4th
548	1060	4120	5440

State to which group in the Periodic Table the element belongs.

[1]

.....

3. By inserting arrows to represent electrons, complete the electronic structure of a chromium atom. [1]

	3s	3p	3d	4s
neon core
