

2. The diagram shows how the Earth’s continents are arranged today.

In 1912, Alfred Wegener proposed the theory of continental drift.

(a) (i) Use statements from the table to answer parts I. and II. below.

A	there are similar animals on different continents
B	there are similar fossils on different continents
C	only Europe, Asia and Africa were once joined
D	all of the continents were once joined
E	there is a jigsaw fit of different continents
F	there are similar rocks on different continents
G	none of the continents were joined

I. Give the **letter** of the statement that describes how Wegener suggested the continents were originally arranged. [1]

.....

II. Give the **letters of three** pieces of evidence that Wegener used to support his theory. [3]

.....

(ii) Underline the correct word in the brackets to complete the following sentence. [1]

Wegener could not explain how the continents moved but it is now known that this happens because of (**conduction** / **convection** / **radiation**) currents in the Earth’s mantle.
