

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
	(c)			white precipitate (1) silver chloride forms / silver ions cause a precipitate with chloride (1) solution turns pink (1) removal of chloride causes equilibrium to shift to left (1)		1 1	 1 1	 4		1 1
	(d)	(i)		$f = 5.79 \times 10^{14}$ (1) $E = hf = 3.84 \times 10^{-19}$ (1) $E = 231$ (1)		3		3	3	
		(ii)		value above 600 nm as this is absorbed by chloro but not aqua / value below 560 nm as this is absorbed by aqua complex but not chloro		1		1		1
